Barbara Haller, MD, PhD, Laboratory Director

**Point of Care Testing: Glucose (waived)**

**UNIT: Cath Lab**

**Date:** 2/10/2020

  
John MacGregor, MD  
Medical Director, Cath Lab

  
Barbara Haller, MD, PhD  
Director, Clinical Laboratory

**Clinical Indication**

Fingerstick glucose testing for patients will be done to determine hypoglycemia or hyperglycemia.

**Documentation**

- Orders and results will be documented in the patient's electronic medical record or a downtime form.

**Clinical Action**

- If result is abnormal or critical, follow appropriate procedure. Refer to reference range in the Fingerstick Glucose policy in <http://www.sfgh-poct.org/glucose/>
- If the blood glucose result does not reflect the patient's clinical symptoms, or seems unusually high or low, perform a control test. If the control test confirms that the system is working properly, repeat the blood glucose test. If the repeated blood glucose result still seems unusual, send a sample to the Clinical Laboratory for blood plasma glucose testing.
